

# HICHAM EL HADRACHI

## DATA ANALYST BUSINESS

### ABOUT ME

#### Data Storyteller & Strategic Alchemist

I thrive on transforming data chaos into actionable clarity that drives any business forward.

#### My Superpower?

With a solid software engineering foundation, I leverage AI and machine learning to uncover hidden patterns and automate the seemingly impossible revealing business opportunities that traditional analysis often misses.

#### My Mission?

To quantify the unpredictable and build the future one insight at a time.

### SOFT SKILLS

- Attention to details
- Critical thinking
- Solution-Oriented
- Adaptability

### LANGUAGES

- English: Fluent
- French: Fluent
- Arabic: Native

### HOBBIES

- Cultural visits
- Documentaries

### CONTACT

Phone: 06 52 07 73 28

- 17 sentier des Piottes, 93160 Noisy-le-Grand

### PROFESSIONAL EXPERIENCES

#### Business Analyst Data

WTW, Mars 2023-July 2025

**Context:** In an international setting at WTW, I joined a team of 4 business analysts to design financial and decision-making reports for WTW and its client BPCE. The goal was to ensure rigorous control of financial flows and optimized monitoring of members.

- Development and automation of SQL and PySpark reports on Azure Synapse and Microsoft Fabric.
- Validation of results using Excel and implementation of data versioning processes.
- Loading, monitoring, and ensuring data quality between Azure Data Lake and Microsoft Fabric Lakehouse.
- Resolving data quality and database issues with technical teams via ServiceNow.
- Regular interaction with business teams (WTW FR/UK and BPCE) to gather requirements and implement improvements.
- Writing and follow-up of user stories through to delivery.
- Creation of technical and functional documentation to ensure transparency and maintainability of solutions.

#### FULL-STACK DEVELOPER (C#/ANGULAR/ANGULARJS)

ARDIAN, October 2020- June 2020

**Context:** Within Ardian's IT department, I contributed to two key projects:

- **PMT:** A predictive modeling system for investment fund performance projections.
- **CFP:** An analytical platform for management control, investor reporting, and cash flow analysis.

#### Tâches réalisées:

- Developed interactive interfaces for complex financial data visualization (Angular, AngularJS).
- Built APIs and services for quantitative data processing (.NET, C#).
- Migrated and optimized financial calculation algorithms from AngularJS to C#.
- Designed and optimized queries for financial databases (SQL Server).
- Implemented automated testing frameworks to validate calculation models (xUnit, Karma/Jasmine).
- Documented analytical processes and provided advanced technical support.

#### Full-Stack Developer (C#/ANGULAR) | Old Experiences (2019-2020)

ICare BNP Paribas & SGSCO Diadeis, Mars 2019 - Septembre 2020

- **ETL Pipelines:** Extraction, transformation, and indexing of multi-format data (Solr).
- **Automated Reporting:** Calculation of complex metrics and generation of regulatory reports.
- **Data Quality:** Validation, testing, and performance optimization for databases.

### Certificates

- **Renewed from 2024:** Microsoft Power BI (PL-300)
- **2024:** Google Google Advanced Data Analytics Professional Certificate
- **2023:** Professional Scrum Master I
- **2020:** Professional Scrum Developer
- **2019:** Master in Software Engineering

### SKILLS

- **Data Visualization & Reporting:** Power BI, Excel
- **Programming & Data Analysis:** Python, PySpark, Jupyter Notebook
- **Databases:** SQL, MySQL, SQL Server
- **Data Engineering & Cloud Platforms:** Microsoft Fabric, Azure DevOps
- **Version Control & CI/CD:** Git, Azure DevOps (Repos, Pipelines)
- **Other Tools:** Microsoft Word, PowerPoint, Visual Studio Code, Visual Studio
